

European Road Safety Observatory

Duration

36 months (April 2023 – March 2026)

Objectives

1. Support to the ERSO with enhanced, updated and integrated road safety data and knowledge, following an integrated and **holistic road safety approach**
2. Enhanced by **new key outputs**, namely the Road Safety Performance Indicators and the Monitoring of National Road Safety Strategies
3. Address the **Safe System Approach** principles, as well as the key areas of the EU Road Safety Policy Framework 2021-2030

Methodology

- 3 Annual Statistical Reports
- 31 Country Profiles for EU and EFTA Countries
- 20 Facts and Figures
- 20 Thematic Reports
- 14 Infographics
- 1 Report on Road Safety Performance Indicators
- 1 Report about the implementation of the road safety strategies in the EU countries

Impact

ERSO is a powerful road safety information system with comparable information among European countries

Publication of road safety performance and delivering feedback on specific risk factors to targeted audiences may motivate population to adopt safer behaviour

ERSO will constitute the basis for monitoring and evaluating the road safety progress at national and EU level over the period 2021-2030
