

Global Road Safety Knowledge Exchange

Duration

13 months (Aug. 2022 – Oct. 2023)

Objectives

- ✓ Promote **knowledge sharing** through appropriate implementation
- ✓ Focus on spreading road safety knowledge to **Low- and Middle-Income Countries**
- ✓ More than 50 Technical Reports, Seminar Proceedings, Case Studies have been reviewed, grouped into **8 major Road Safety Areas**: Management, Infrastructure, Tunnels, VRUs, Behavior, Vehicle, Speed and Data

Methodology

- Build road safety expertise by developing a strong Lead Agency and a robust set of local guidelines and regulations
- Quality data collection and analysis can facilitate the management of the road network and of the overall traffic system
- Crash data and Safety Performance Indicators should support evidence based policies, programs and measures at the LMIC

Impact

Disseminate even more actively knowledge on road safety across the world

Provide monthly updates on road safety work on website and social media channels

Road safety authorities and stakeholders are able to interact with road safety experts, engage and learn more about reports and knowledge products
