Presentation Outline

1. The NTUA Department of Transportation Planning and Engineering (7)
2. Transportation Engineering (4)
3. Education (8)
4. Research (2)
5. Cooperations and Partners (6)
6. Laboratories (17)
The NTUA Department of Transportation Planning and Engineering
The NTUA Department of Transportation Planning and Engineering

➢ The Department of Transportation Planning and Engineering (www.transport.ntua.gr), established in 1982, is a Center of Research and Innovation Excellence in Transportation, with global recognition [ranked 4th in Europe, 26th worldwide (EduRank 2023), 41st in Europe, 168th worldwide (ShanghaiRanking 2023)]

➢ within the School of Civil Engineering (one of the five Departments) [ranked: 2nd in Europe and 5th worldwide (ShanghaiRanking 2023), ranked: 11th in Europe and 31st worldwide (EduRank 2023), 21st in Europe and 69th worldwide (QS 2023)]

➢ of the National Technical University of Athens (the oldest of the eight engineering Schools) [the oldest (since 1837) and most prestigious Greek Technical University] [ranked: 195th (7%) in Europe and 494th (4%) worldwide (EduRank 2023), 422nd (30%) worldwide (QS 2023)]
Mission

The Mission of the NTUA Department of Transportation Planning and Engineering is:

➢ to educate scientists engineers,
➢ to promote science and
➢ to support development

in the field of transportation planning and engineering

High scientific standards and performance are key objectives in all education and research activities of the Department
The Vision of the NTUA Department of Transportation Planning and Engineering is a future with highly efficient, green and safe transport systems in Greece, in Europe and globally, through high level scientific research and technological development supporting evidence based decision making in all aspects of all transport modes and types.
Department People

A dynamic team of more than 80 renowned scientists

- Faculty 5
- Emeritus Professors 6
- Special Lab & Teaching Staff Member 2
- Post Doctoral Researchers 16
- PhD Candidates 33
- Technical and Administrative Staff 6
- Research Assistants 14
Department Faculty

George Yannis
Professor, Director

Eleni Vlahogianni
Professor

Christina Plati
Professor

Stergios Mavromatis
Assistant Professor

Konstantinos Gkiotsalitis
Assistant Professor
Alumni Careers

Postgraduate/PhD students and PostDoc researchers of the Department demonstrate excellent careers in Greece and globally:

• Academia (TUMunich, TU Delft, ENPC Paris, EPFL, ULoughborough, UCyprus, UPatras, etc.)
• Ministries (Transport, Development, Economy)
• Transport Authorities (Motorways, Metro, Public Transport, Airports, Ports, Railways)
• Regional and City Authorities (Athens, other cities)
• Engineering Firms and Consultancies
• Industry (road, rail, air, sea, intermodal)
• International Organisations
Supporting Development

The scientists of the Department have served Greek Government at all levels (Ministers, Secretary Generals, Chairmen, BoD Members, Minister Advisors, etc.) at:

- Ministry of Infrastructure and Transport
- Ministry of Development and Investments
- Ministry of Finance
- City of Athens
- Hellenic Railways
- Athens Transport Authority
- Athens Metro
- Athens Airport
- Athens Master Plan Authority
Transportation Engineering
Transport Infrastructure in Greece

• 42,000 km Interurban Road Network
• 2,500 km Railway Network
• 40 Major Airports
• 60 Major Ports
• >100,000 km Urban Road Network
Transport Infrastructure in Europe

The Trans-European Transport Network (TEN-T) comprises:

- > 7,200,000 km Main Road Network
- > 330,000 km Main Railway Network
- > 850 Major Airports
- > 3,000 Major Ports
Transportation Engineering Scope (1/2)

Transport Modes
- Road transport
- Rail transport
- Water transport
- Air transport
- Combined transport

Transport Types
- Transport of people and goods
- Urban and interurban transport
- National and international transport
- Terminals
Transportation Engineering Scope (2/2)

Transportation projects in all phases

- Planning
- Design (Conceptual, Preliminary, Final General and Detailed)
- Tendering
- Construction
- Delivery for operation
- Operation
- Management
- Maintenance
Every year, we train more than 1/3 of the total number of students of the School.
The Department offers:

- 22 undergraduate courses at the School of Civil Engineering (compulsory and elective for all civil engineering students and all students of the transportation cycle)
- 3 undergraduate courses at NTUA Engineering Schools
- 5 postgraduate courses at NTUA Engineering Schools
Courses - Transportation Cycle

• Traffic Flow
• Design of Road and Airfield Pavements
• Urban Road Networks
• Railway Engineering
• Advanced topics on Roads Geometric Design
• Public Transit Planning
• Traffic Management and Road Safety
• Airport Planning and management
• Pavement Evaluation and Maintenance
• Combined Transport - Advanced Systems
• Analysis Methods in Traffic Engineering
• Pavements - Special Topics
• Quantitative Methods in Transportation
• Integrated Project in Transportation Engineering
Courses at the School of Civil Engineering and other Schools

- Laboratory on Materials
- Roads Geometric Design
- Roads Construction
- Transportation Systems Planning
- Environmental Impacts
- Practical Training
- Highway Engineering IV (Construction elements of road works), SRSGE
- Special Topics on Roads Geometric Design
- Planning - Design - Operation of Road Works, SRSGE
- Environment and Development, NTUA

Contribution to MSc Programs

- Shipping and Maritime Transport, Water resources science & technology
- Optimization of Infrastructure Networks, Water resources science and technology
- Transport and Traffic - modern vehicles, Energy Production and Management
- Urban Transport systems, Architecture - Spatial Design
- Data driven models in civil engineering problems, Data science and machine learning

Department of Transportation Planning and Engineering - February 2024
Integrated Transport Planning Project

Greek Island Transport Plan Development
Exploitation of real data in a project that covers all transportation engineering disciplines, combining all different transport and development objectives in a comprehensive and integrated approach:

- Full analysis of current transportation situation
- Transportation (Internal and external transport analysis, Planning passenger / cargo ports and airports)
- Traffic Engineering (Traffic Analysis, Identification of high risk sites, Urban Mobility Plan)
- Road construction (Configuration of critical junctions, Pavement upgrade program)
- Technical and economic analysis of the overall plan of transportation development (cost-benefit)
Diploma Theses (10th semester)

1305 Diploma Theses since 1975

27 Diploma Theses per year

Diploma Theses / Year

Diploma Theses / Course

Integrated Project in Transportation...
Traffic Management and Road Safety
Pavement Evaluation and Maintenance
Geometric Design of Roads
Airport Planning and management
Urban Road Networks
Combined Transport - Advanced Systems
Special Topics on Road Design
Transportation Systems Planning
Special Topics on Pavements
Analysis Methods in Traffic Engineering
Roads Construction
Special Topics of Road Geometric Design
Railway Engineering
Quantitative Methods in Transportation
Traffic Flow
Assessment and Impact of Transport...
Special Topics on Transportation
Design of Road and Airfield Pavements
Railway Safety and Maintenance
Public Transit Planning
Conferences – Workshops

- Telematics boosting mobility behaviour, NTUA - NRSO, 22/11/2023
- Road Safety Research Challenges, NTUA - NRSO, 19/5/2023
- Telematics and Driver Behaviour Workshop, NTUA - NRSO, 4/4/2023
- Data Requirements for Freight Transport Planning and Operation, NTUA – ENIRISST, 22/2/2023
- Road Safety & Simulation 2022, NRSO - HITE, 8/6/2022
- Innovation in Road Safety Research Workshop online, NRSO, 20/5/2021
- PIONEERING Solutions for the Smart City Challenge, NTUA - Pioneer Alliance, 15/4/2021
- NTUA - Innovation in Road Safety Research, NRSO, 17/5/2019
- Digitalisation and Road Safety Research Workshop, NTUA, 17/5/2019
- Training course on the use of the Aimsun Next Traffic Simulation Program, AIMSUN - NTUA - TUMunich, 4/11/2018
- hEART2018 - 7th Symposium of the European Association for Research in Transportation, NTUA - TUMunich, 5-7/9/2018
- 10th International Conference on the Bearing Capacity of Roads, NTUA - TU Delft, 28-30/6/2017
- The Future of Road Safety Research Workshop, NTUA, 15/5/2017
- Cognition, Behaviour and Driving Inter-disciplinary Conference, NTUA - UOathens, 26/6/2015
- 6th Pan-Hellenic Conference on Road Safety, NTUA - HITE, 12-13/3/2015
- Road Infrastructure Safety Equipment Technical Conference, NTUA - European Road Federation - HITE, 12-13/2/2015
Research Projects

More than 390 Research Projects
• > 135 International
• > 255 Greek

With more than 500 international partners
More than 200 through highly competitive procedures
Scientific Publications

Publications in Journals > 500

Publications in Conferences > 1,000

Presentations in Conferences > 500

Citation Index – Scopus > 7,000

Citation Index - Google Scholar > 12,000
Cooperations and Partners
Our Cooperations Greece
Our Cooperations - Europe
Our Cooperations - Worldwide
Our Cooperations - European Universities
Our Cooperations - Universities Worldwide
Our Cooperations - Research Institutes
Laboratories
Laboratories

Pavement Engineering Laboratory

Railways and Transport Laboratory

Traffic Engineering Laboratory
Laboratory of Pavement Engineering

Established in early ‘60s

Section of Pavement Materials, Testing and Characterization

Section of in-situ pavement testing and evaluation

Education
Research
National and International collaborations
Laboratory of Pavement Engineering
Research Infrastructure and Priorities (1/3)

Section of Pavement Materials, Testing and Characterization

• Evaluation and proportioning of raw materials
• Materials (bound or unbound) testing and mechanical characterization
• Compaction
• Low-energy mixes testing and evaluation
• Assessment of alternative materials for pavement construction
Section of in-situ pavement testing and evaluation

• Non Destructive Testing (NDT) in the field
• Pavement instrumentation (fiber optics)
• In-situ performance evaluation of pavement materials
• Pavement evaluation (structural and functional)
• Bearing capacity of roads and airfields
Laboratory of Pavement Engineering
Research Infrastructure and Priorities (3/3)

Section of in-situ pavement testing and evaluation

- Geophysics applications using Ground Penetrating Radar (GPR)
- Dielectric properties of pavement materials
- Pavement structure inspection (layers, cracks, moisture)
- Railway ballast assessment using GPR
- Post compaction assessment - Quality control
- Thermal camera use - Quality control
Laboratory of Pavement Engineering

Key Research Priorities

Section of Road Design

• Safety assessment of road design guidelines through vehicle dynamics – 3D road surface interaction

• Infrastructure design for Autonomous and Connected Vehicles

• ADAS deployment in vehicle automation environment
  • guidance
  • sight distance (stopping, passing, intersection)
  • speed adaptation

• Safety and operational assessment of heavy vehicle
Laboratory of Pavement Engineering
International Collaboration

FEHRL
Brussels

Decision making and excellence

Greek FEHRL Group
(since 2004):

Ministry of Infrastructure and Transport
Central Public Works Department

Laboratory of Pavement Engineering
of the School of Civil Engineering of NTUA

Department of Transportation Planning and Engineering - February 2024
Laboratory of Pavement Engineering

Key Research Goals

• Sustainable and innovative pavement materials – adaptation on climate changes
• Remote and automated systems for pavement rehabilitation
• Advances in systems assessing pavement condition
• Using vehicle communication systems for assessing pavement performance
• Pilot studies for assessing the performance of pre-fabricated pavements that contain sensors
• Life Cycle Assessment (LCA) of pavements
Laboratory of Railways & Transport
Research Areas

Established in: 1962

- **Public Transport** planning and control
- **Freight** Transport and Logistics
- **Airport** planning and operations
- **Railway** design and maintenance
Laboratory of Railways & Transport Research Infrastructure

- Traffic load meters
- Traffic congestion map of Athens
- Rail stress measurement sensors
- Sound meters, video cameras and endoscopic cameras
- Oscilloscope, microcontroller application development tools
- Servers
- Geographic Information System (GIS)
- Specialised software (AIMSUN, ARENA, AnyLogic, Gurobi)
Laboratory of Railways & Transport
Example Key Projects

Impulse, ITIP, CREAM
➢ Simulation & Prototyping of Innovative Handling Systems
  • AGV/ASC container handling equipment
  • Moving Train
  • ISU handing system for conventional semitrailers

F-MAN, iCS
➢ Wagon fleet management
➢ Intermodal transport
  • Development of iCS service (Athens – Thessaloniki)
  • Wagon loading algorithm
  • Decision support for truck dispatching
Laboratory of Railways & Transport International Partnerships

TU Delft
TUM
UNIVERSITY OF TWENTE.
CHALMERS UNIVERSITY OF TECHNOLOGY
ectri
EPFL
TRB
UITP

Department of Transportation Planning and Engineering - February 2024
Laboratory of Railways & Transport

Key Research Priorities

• Optimization of Passenger and Freight Transport Systems
• Optimization of Transport Systems Planning
• Creation of Intelligent Transport decision making Systems
• Development of research infrastructure for transport & logistics
• Wagon fleet management (Balkan countries, development of smart OBD)
• Analysis of Greek coastal shipping and air services
• Urban Freight Truck routing
• Freight villages (legislation modernization)
Laboratory of Traffic Engineering
Research Areas

Traffic Management
• Data driven traffic flow analysis and forecasting
• Mobility as a service, electromobility, connected/shared mobility
• Network level traffic prediction and management
• Design and operation of traffic management & parking systems

Road Safety
• Driver Safety Behavior & Telematics
• Road Infrastructure Safety
• Road Safety Data, Knowledge & Management Systems

Intelligent Transportation Systems
• Smartphone sensing and analytics, driving telematics & analytics
• Traffic Automation
• Impact assessment of ITS, mobility, environment and safety
Laboratory of Traffic Engineering
Research Infrastructure

• **Driving Simulator** (Foerst ¼ cab, moving base) for driver behavior experiments
• **Unmanned Aerial Vehicles (Drones)** for traffic monitoring
• **On-Board Diagnostics Devices (OBD)** for driver behavior monitoring
• **Cameras** for traffic monitoring
• **Other devices** for traffic counts, speed monitoring, position monitoring (GPS)
Labtopory of Traffic Engineering
Data and Knowledge Systems

Information Systems
- NTUA Road Safety Observatory >2,220 items, >30,000 visits/month
- Digital Road Safety Library > 6,500 key Reports
- International Bibliography databases (scopus, science direct)
- Analysis tools (traffic, simulation, statistics)

Databases
- SANTRA - Greek Road Accident Database with disaggregated data (1985 - 2019, 1,3 million recordings)
- CARE - European Road Accident Database with disaggregated data (1991 - 2020, 40 million recordings)
- IRTAD International Road Accident Database with aggregated data
- Databases of International Organizations (WHO, IRF, ERF, UITP)
- Databases with Aggregated Data (Vehicle fleet, veh-km, driver behavior, etc.)
Laboratory of Traffic Engineering

Example Key Projects

**Driver-Vehicle-Environment Interactions and Safety Tolerance Zone**

- i-Dreams (2019-2023)
  - Driving telematics from smartphones
  - Identification of safety-relevant behavior
  - Assessment and prediction of risk
  - 600 operators Experiment
  - 4-stage 5-country experiment across 4 transport modes (car, bus, truck, train)
  - Big data handling and processing
  - Intervention selection and testing
  - Real-time effectiveness (safety critical events, etc.)
  - Post-trip feedback (driver state, etc.)
  - Definition, development, testing and validation of a context-aware Safety Tolerance Zone

**SHared Automation Operating Models for Worldwide Adoption**

- Show (2019-2024)
  - Deployment of shared, connected, cooperative, electrified fleets of autonomous vehicles
  - In coordinated:
    - Public Transport (PT)
    - Demand Responsive Transport (DRT)
    - Mobility as a Service (MaaS) and Logistics as a Service (LaaS)
    - Operational chains
  - In real-life urban demonstrations in:
    - 5 Mega
    - 6 Satellite and 3 Follower Pilots
  - Taking place in 20 cities across Europe
Laboratory of Traffic Engineering
Key Research Priorities

• Automation and Connectivity
• Driving Telematics (smartphones & wearables)
• Drone based traffic monitoring and analysis
• Traffic and driving simulation
• Smart Cities
• 5G traffic
• Traffic and Safety Big Data
• Traffic and Safety Information Systems
