

Support of TRAINOSE SA in the pilot implementation of services of the logistics chain in the Thessaloniki-Sofia route

Scientific Responsible
Associate Professor **Athanasios Ballis**

Support of TRAINOSE A.E. in the pilot implementation of services of the logistics chain in the Thessaloniki-Sofia route by investigation of technical issues in respect to the selection of the adequate transport units and rolling stock, identification of gauge limitations as well as other issues related to competition with road transport. In addition, NTUA will investigate issues related to the pricing policy of the company and will elaborate data collected by TRAINOSE A.E. in respect to the punctuality of the itinerary and the overall evaluation of the pilot implementation.
