Management, Organisation, Development and Planning of a Multi-Operation System for the Development of the Interurban Bus Central Terminal at Eleonas

Scientific Responsible Professor **John Golias**

The size and transport needs of Athens make it imperative to upgrade the two existing Intercity Bus Stations currently located in Kifissos Avenue and Liosion Avenue. The new Central Bus Terminal project will replace the two existing Interurban Bus Stations and bring together their services, substantially upgrading the service of passengers wishing to travel by road between Athens and other regions of Greece.
