## Road safety audit of the final road design of the Hellinikon metropolitan pole

Scientific Responsible
Professor **George Yannis** 

The project concerns the road safety audit of the final road design of the main road network of the Hellenic – Ag.Kosmas metropolitan pole development project. The project will draw up a report with the aim of identifying areas that may raise safety concerns. These areas, if any, based on the severity of road safety deterioration, will be classified as follows:

- great burden
- moderate burden
- small burden

In addition, recommendations on any corrective interventions needed will be developed to assist both the project management body and the researchers in understanding the importance of this audit.
