e-MOPOLI - Electro mobility as driver to support policy instruments for sustainable mobility

Scientific Responsible
Professor **George Yannis**

The aim of this project is the scientific support of Region of Attica, partner of the project "e-MOPOLI – Electro mobility as driver to support policy instruments for sustainable mobility" which aims to the deployment of electromobility and alternative fuels through the improvement of 9 policy instruments related to the Structural Funds. Within this framework all necessary actions will be carried out for the smooth implementation of the Action Plan for the electrification of Region of Attica. For this purpose, the existing legal framework for e-mobility will be collected, a feasibility study and a cost benefit analysis will be carried out, appropriate specifications of electric vehicles and charging stations will be drawn up and a roadmap for the implementation of the interventions will be developed.
