## NAPCORE - National access point coordination organisation for Europe

Scientific Responsible Professor **George Yannis** 

The aim is to stimulate and accelerate the coordinated provision of ITS data to improve the quality of services based on this data, through the establishment of long-term governance and the facilitation of national and Community operational coordination for the implementation of European standards. In particular, harmonization of the development and evolution of APS will be considered in order to improve the compatibility and interoperability of features, the design and development of common tools related to accessibility a NAPCORE - National access point coordination organisation for Europend data exchange, and the planning and coordination of collection initiatives data. More precisely the proposed Action shall be based on following tasks to be undertaken: Project Management, Steering Committee support. Identification of action needed, implementation and evaluation, Dissemination, outreach activities, training, NAP Platform strategy and governance, Interoperability and level of service of NAPs, NAP content and accessibility, Data Exchange Standards, National Bodies and compliance assessment.
