SafetySkills - Development of road safety skills and promotion of related actions in middle and low income countries

Scientific Responsible
Professor **George Yannis**

The project aims to support the development of road safety and traffic management skills by the transport sector scientific workforce with an emphasis on middle- and low-income countries worldwide. In addition, the development of a dialogue will be supported with a view to providing recommendations for the identification and implementation of appropriate road safety actions and promoting the adoption of specific, well-funded, relevant initiatives, mainly in these countries.
