## **Evaluation of rigid toll roads of Attiki Odos**

Scientific Responsible
Professor **Andreas Loizos** 

The object of the project assigned to the team of the Laboratory of Pavement Engineering of the National Technical University of Athens (NTUA), is the evaluation of the rigid pavements of the toll stations of Attiki Odos. The aim is to draw conclusions regarding the possible maintenance or restoration of road surfaces that present forms of failure.

For this purpose and in order to formulate proposals for the possible maintenance or restoration of the road surfaces, measurements will be carried out and their results will be evaluated.

For the smooth completion of this project, the available study and visual data from the Laboratory will also be used.
